Rock Drill U1838ME

High speed rock drill with stable performance
Hole range 38-64mm

With quality as the foundation and innovation as the driving force, Uniroc creates greater value for you.

Longer Service Life

Main features:

- 1# Efficient drilling can minimize the risk of jamming.
- 2# Under high-frequency impact conditions, the impact piston still operates stably.
- 3# Equipped with all levels of frequency conversion system, which can meet the working requirements of different surrounding rock grades.

The design of heavy-duty front head is optimal for face drilling.

Seal kit, overhaul kit and repair set are available for maintenance ease, and to ensure extended service life of rock drills.

Service solutions ensure that rock drill performs at its best throughout its life cycle.

Technical Specifications

Dimensions And Weight	
Weight	179kg
Length without shank adapter	1008mm
Width including connectors	288mm
Height	223mm
Height over drill center	85.5mm

Impact Ratings	
Impact power (maximum)	18kW
Input power to rock drill (maximum)	31kW
Hydraulic pressure (maximum)	230Bar
Flow rate	75-92L/min
Impact frequency	60Hz

Rotation Motors			
Type	05 (100cc)	06 (125cc)	07 (160cc)
Rotation range	0-340rpm	0-275rpm	0-215rpm
Torque (maximum)	640Nm	820Nm	1000Nm
Working pressure (maximum)	210bar	210bar	210bar
Oil consumption	75L/min	75L/min	75L/min

Flushing Flow And Pressure	
Flushing water pressure (maximum)	25bar
Lubricating air consumption at 2 bar	5L/s
Flushing water consumption*	40-120L/min

* Flushing water consumption depends strongly upon hole diameter, bit type, drill rod size and rock hardness.
